

3D Printing Workflow

Find or create 3D model

Program: Tinkercad

If you already have a file, you can skip these steps.

Export to downloads

Filetype: .STL

Import into Slicing program

Program: PrusaSlicer

Slicing converts the model into 3D printer instructions.

Export to USB stick

Filetype: .bgcode

Plug USB into 3D printer

Print the 3D object!

Printer: Prusa MK4
