

CRAFTS TO GO

Snowglobe Instructions

Materials needed:

- Water

Optional:

- Hot glue or super glue
- Heavey tape or Duct tape

1. Unscrew the jar and add the glitter into the jar.
2. Add water all the way up to the top in order to have only a small amount of air left in the jar.
3. Replace the lid on the jar. Do this over the sink as the water may leak over once the lid is replaced.
4. Screw the lid on as tight as you can.
5. Shake your jar and watch the glitter swirl around your new little friend!

Note: the jars will still leak a little bit after they are assembled. If you want a tight seal you can add some type of glue or tape around the lid to help ensure a better seal. You can also leave it unsealed and change your glitter from time to time!
