

CRAFTS TO GO

Popsicle Stick Picture Frame

Materials Included:

Popsicle sticks
Cardstock paper
Magnets
Metal clip
Buttons

Materials Needed:

Drawing/picture to display
Glue (tacky glue works great!)
Scissors
Object to help frame dry (see #5 below)

Directions:

1. Choose a small photo or drawing.
2. Arrange the Popsicle sticks side by side how you'd like them to look.
3. Cut a piece of cardstock paper to fit the shape of your frame. The cardstock paper should touch each Popsicle stick. This will be the support.
4. Glue cardstock paper to the back of your frame. Hold down 20-30 seconds to make sure each Popsicle stick adheres to the paper.
5. Lay a book or similar object on top of your frame to dry flat for a little while. This will prevent your frame from warping/curving.
6. Add sticky magnets to the back of your frame. (The side with the paper.)
7. Flip your frame over and glue the clip where you'd like the display your picture.
8. Decorate the corners and edges of the frame with buttons.
9. Clip in your picture and display!
